

*Dean...
Message to graduands*

There is no doubt that endeavor of the parents are commendable. Here today, the pride you feel with the successes of your children is the fruit of your labor. We are, at least as happy as you are, to have given the efforts to touch their lives as a family of Near East University.

It has been an honor for us to convey our experience and care within the Civil and Environmental Faculty, which won the best Faculty award for the year 2018, which held 3 international conferences within the year of 2019, together with our Nobel winning and other high quality staff members within our internationally accredited undergraduate and graduate programs for our students coming from 41 different countries

Dear graduates, with this diploma you are lighting a torch in your life; a science and technology torch! This torch you will carry for life will be your basic guide for all your technical and social successes. I hope your torch will never fade, and will always carry you to a brighter future.

With love and regards!

Prof. Dr. Hüseyin Gökçekuş
Dean
Civil and Environmental Engineering Faculty
